RE: Standard Specifications for Sewer Systems  
BERKELEY COUNTY WSA

Dear MR. BONGE:

This office has reviewed the sanitary sewer specifications submitted to this office on 08/23/2002 for consideration of becoming Standard Specifications. Based on our review, this letter may serve as your approval. The specifications were approved on 11/20/2002 for the following:

1. GRAVITY LINES (PVC,DIP);
2. FORCE MAINS (PVC,DIP); and
3. MANHOLE DETAILS (STAN.,DROP, FM TIE-IN).

Please be advised that these Standard Specifications are not approved for pump stations or any pipe material other than those listed above. If one of these is to be used, then additional specifications must be submitted on those projects.

For future submittals of projects, please indicate on the application for permit to construct that your specifications have been approved as Standard Specifications and that no additional copies will be necessary.

If you have any questions, please call me at 898-4020.

Sincerely,

JASON ASBILL  
Construction Permitting Section  
Water Facilities Permitting Division  
Bureau of Water
